---

## CAREER OBJECTIVE

---

An adept front-end developer with intermediate knowledge use of CSS, HTML, React.js, and Javascript. I create engaging user experience through efficient version control and testing.

With a passion for personal growth and software development, I have gone through the AltSchool engineering program, also have Project experience in React.js, and javascript with exposure in typescript, vue, Word press, and React typescript.

## PROJECT HISTORY

---

### PORTFOLIO WEBSITE

- Built a personal responsive website using react javascript. it has an animated landing page that contains a navbar and button links to my projects and a working contact me page. Implementing my knowledge of Custom APIs on the project page, and using email.js dependency for the contact form. it was further deployed to firebase using the vscode terminal.  
(REACT.JS, FIREBASE, vscode, EMAIL.JS)

### PHONIE PROJECT

- This was a Holiday Challenge given by the AltSchool engineering boot camp. with my Knowledge of HTML, CSS, AND JAVASCRIPT I created a form that detects the Network carrier of the phone number(Restricted to Nigerian Networks) typed into the form and displays the logo beside the input field.  
(HTML, CSS, JAVASCRIPT)

### APEX TALENTS WEBSITE

- with my knowledge of HTML and CSS, I contributed to the creation of a functioning website for a startup tech recruitment company called ApexTalents.
- I created and maintained the website using WordPress and ELEMENTOR.
- i was also tasked with the responsiveness and accessibility of the website  
(WordPress, ELEMENTOR)

### GITHUB PROFILE FETCH

- Using my Knowledge of APIs and custom hooks I was able to complete this task given to me by AltSchool Africa.
- I fetched my Github profile and repositories using a GitHub API and a dependency called Axios.
- I designed a Simple UI for this project for accessibility.
- I was also tasked with creating an error boundary page which I learned while working on this task and came to understand the use and implementation

- Also tasked with creating a 404 page for when a page can't be found or retrieved.
- Further deployed to Firebase for hosting  
(REACT.JS, FIREBASE)

#### **REACT CALCULATOR**

- This Project was created using react using the UseReducer hooks. it is fully functional and accepts inputs and displays the output after computation.  
(REACT.JS)

#### **EDUCATION**

---

2022	<b>Frontend Engineering</b> Alt School Africa by TalentQL
2019	<b>Computer Science (OND)</b> Yaba College of Technology, Lagos.

#### **Perks of working with me**

---

- Ability to work remotely
- Working with little or no supervision
- Ability to work in a dynamic and fast-paced environment
- Ability to work in different time zones
- Work with Distributed teams
- Adaptability & Flexibility
- Open to learning
- Work with Ambiguity

#### **HOBBIES AND INTERESTS**

---

Playing Games, Reading & Research, Travelling, networking, and Learning new things.

#### **BIO**

---

Date of Birth: 23<sup>rd</sup> May 1999  
Gender: Male

#### **REFERENCE**

---
